

ADDITIONAL RESOURCES

Introduction to Hand-out Materials

In addition to the PowerPoint slides that accompany the webinar presentation, we have provided the following materials:

Resources on Reducing Anti-Psychotic Medications for People with Dementia

1. **Management of Behavioral and Psychological Symptoms in People with Dementia Living in Care Homes: A UK Perspective**, a presentation delivered by Clive Ballard to the CMS Technical Expert Panel Meeting for its National Initiative to Improve Behavioral Health & Reduce the Use of Antipsychotic Medications for Nursing Home Residents on 04/10/2012 – 04/11/2012. *Please note that while this presentation is not referred to directly in the webinar, it is included in the webinar materials because it provides a background on a similar initiative in England.*
2. Use of Nonpharmacologic Interventions Among Nursing Home Residents With Dementia by Cameron J. Camp, Ph.D. Jiska Cohen-Mansfield, Ph.D. Elizabeth A. Capezuti, Ph.D., R.N., Psychiatric Services <http://psychoservices.psychiatryonline.org> * November 2002 Vol. 55 No. 11
3. Dementia doesn't cause 'sundowning' – we do, an article by G. Allen Power, MD in The Journal of Dementia Care, Vol 20 No 3, May/June 2012

Resources for Exercises on Critical Thinking to Identify the Root Causes of Behavioral Communication

4. Facilitator's Guide, provides suggested exercises to be used in viewing the webinar in a group setting.
5. The 5 Whys Worksheet – a quality improvement tool to assist in root cause analysis
6. "McNally" cards – a case study presented through a group exercise that demonstrates the link between disruption of customary routines and initiation of anti-psychotic medications
7. McNally cards instructions – a guide on how to use the exercise
