The STI/HIV/VH Branch works to reduce STI/HIV/VH infections and ensure quality STI/HIV/VH care and treatment services for all people in Colorado. Our mission is to support access to a full spectrum of services, from prevention to care, that leads to the elimination of STI, HIV and VH.

Our functions include:

- Surveillance of STI/HIV/VH infection.
- Follow-up of people diagnosed with an STI/HIV/VH infection to ensure adequate treatment and partner notification.
- Providing access to care and treatment as appropriate.
- Developing comprehensive prevention programs.
- Collaborating with at-risk communities, non-governmental organizations and local health departments.
- Training medical providers and public health professionals.
- Conducting research to enhance STI/HIV/VH epidemiology and prevention.
